

Digital Marketing Strategy

From Business Goals to Digital Growth

A comprehensive guide to Objectives, STP, The Marketing Funnel, and AARRR Metrics.

INSIGHT

This deck is designed as a standalone handbook. Read it to build your strategy engine.

STRATEGY IS THE MAP; WITHOUT IT, YOU ARE JUST MAKING NOISE.

RANDOM POSTING

STRATEGIC PLANNING

THE FOUR QUESTIONS OF STRATEGY

1. WHAT WE WANT TO ACHIEVE
(Objectives)

2. WHO WE WANT TO TARGET
(Audience)

3. HOW WE WILL REACH THEM
(Channels & Funnel)

4. HOW SUCCESS WILL BE
MEASURED (Metrics)

INSIGHT SIDEBAR

INSIGHT:
Strategy comes
before ads,
posts, and
campaigns.

Without it,
digital
marketing is
just random
posting.

YOU CANNOT HIT A TARGET YOU HAVEN'T DEFINED.

Digital Marketing Objectives are specific, measurable goals.

BRAND AWARENESS

Increasing reach, impressions, and followers (e.g., Launching a new brand on Instagram).

TRAFFIC GENERATION

Driving users to a website or app (e.g., Blog content, SEO).

LEAD GENERATION

Collecting emails, sign-ups, or inquiries (e.g., eBook downloads).

SALES & CONVERSIONS

Purchases or bookings (e.g., E-commerce sales).

CUSTOMER RETENTION

Repeat purchases and loyalty (e.g., Email campaigns).

INSIGHT:

Engagement (likes, comments) is also a valid objective, often serving as a proxy for Awareness.

MAKE YOUR GOALS CONCRETE USING THE SMART FRAMEWORK

S 

SPECIFIC:
Clearly defined
and focused.

M 

MEASURABLE:
Quantifiable
with tracking
metrics.

A 

ACHIEVABLE:
Realistic and
attainable.

R 

RELEVANT:
Aligned with
broader
objectives.

T 

TIME-BOUND:
Set with a
deadline.

THE VAGUE GOAL:
"I want more people
on my site."

THE SMART GOAL:
"Increase website traffic by
25% in 3 months via SEO
and Google Ads."

INSIGHT:
A goal without
a timeline and
a metric is just
a wish.

Marketing to everyone is marketing to no one.

The STP Process

INSIGHT:

Digital tools allow for hyper-specific segmentation that traditional marketing never could.

Slicing the pie and picking the best slice.

Segmentation Bases

-  • Demographic (Age, gender, income)
-  • Geographic (City, country)
-  • Psychographic (Lifestyle, interests)
-  • Behavioral (App usage, purchase history)

Targeting Methods

-  • Custom audiences
-  • Lookalikes
-  • Retargeting

Target Example: GYM

Men & women aged 20–35.
Interested in fitness &
bodybuilding. Located in
Karachi or Lahore.

INSIGHT:

Facebook and Google allow you to segment users based on interests as specific as 'fitness' or 'tech'.

Owning a distinct space in the consumer's mind.

The Positioning Concept

“Spotify Positioning: ‘Music for every mood’.”

Positioning creates a distinct image through brand message, visual identity, content tone, and value proposition.

INSIGHT:

Positioning isn't what you do to the product; it's what you do to the mind of the prospect.

Guiding the user from 'stranger' to 'advocate'.

INSIGHT:

Digital funnels are non-linear. Users can enter or exit at any stage, unlike traditional linear paths.

Using the right tool for the right stage.

MARKETING STAGE			
Awareness →	 Social media ads	 Influencer marketing	 YouTube ads
Interest →	 Website content	 Email newsletters	 Reviews
Conversion →	 Landing pages	 Retargeting ads	 Discounts
Retention →	 App notifications	 Loyalty programs	
Advocacy →	 Referral programs	 User-generated content (UGC)	

INSIGHT:

Don't use a 'Conversion' tool (like a discount code) when the user is still in the 'Awareness' stage.

The Startup Growth Engine: The AARRR Model.

Also known as Pirate Metrics. A framework to obsessively measure growth.

INSIGHT:

While traditional funnels end at the sale, AARRR emphasizes what happens after the user arrives.

Measuring what matters with AARRR.

INSIGHT:

Activation is the most critical step—it differentiates a "visitor" from a "user".

Choosing your framework: Marketing Funnel vs. AARRR.

Your Turn: Build the Digital Strategy Blueprint.

Strategy Canvas

INSIGHT:

Keep it simple. One clear objective is better than five vague ones.

The Golden Rules of Digital Strategy.

1

Start with Goals: Strategy always begins with defined objectives, not content creation.

2

Precision Targeting: Use STP to identify exactly who you are talking to.

3

Guide the Journey: Use the Funnel to map the path from awareness to purchase.

4

Measure Growth: Apply the AARRR model to track retention and referrals.

INSIGHT:

Review these rules before every new campaign launch.

Plan first. Execute second.

Without strategy, digital marketing is just random posting.

Use the blueprint to turn noise into growth.

INSIGHT:

End of Guide.
