

Startup

A startup company (startup or start-up) is an entrepreneurial venture which is typically a newly emerged, fast-growing business that aims to meet a marketplace need by developing a viable business model around innovative product, service, process or a platform.

Startup Culture

A startup culture is a workplace environment that values creative problem solving, open communication and a flat hierarchy. It also promotes business agility and adaptability as being key virtues now large companies are realizing that they could benefit greatly by putting more emphasis on startup culture values likes : [More Efficient](#) , [Continuous improvement](#) , [Agility](#) , [Adaptability](#) , [Minimize Cost](#) , [Improve Quality](#)

Kaizen

改善

Kai = Change Zen = Good

Kaizen (改善), is the Japanese word for "continual improvement ". In business, kaizen refers to activities that continuously improve all functions and involve all employees from the CEO to the assembly line workers.

Kaizen is a lean manufacturing tool that improves quality, productivity, safety, and workplace culture. Kaizen focuses on applying small, daily changes that result in major improvements over time.

LEAN

Lean, as a management philosophy, is focused on improving process speed and quality through reduction of process wastes.

The core idea is to maximize **customer value** while minimizing waste. Simply, lean means creating more value for customers with fewer resources.

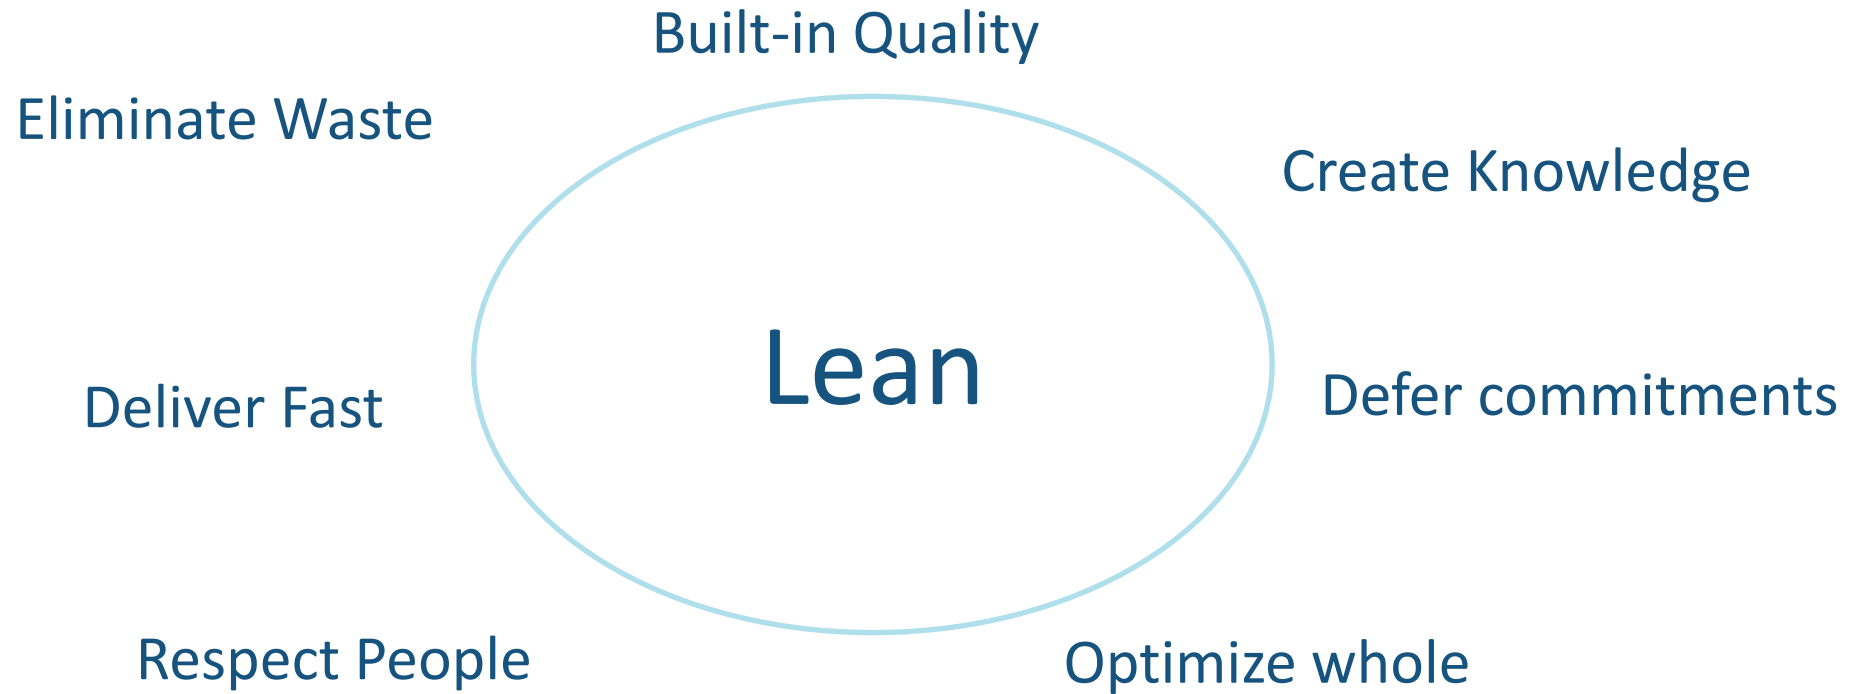

**Maximising
Value**

**Eliminating
Waste**

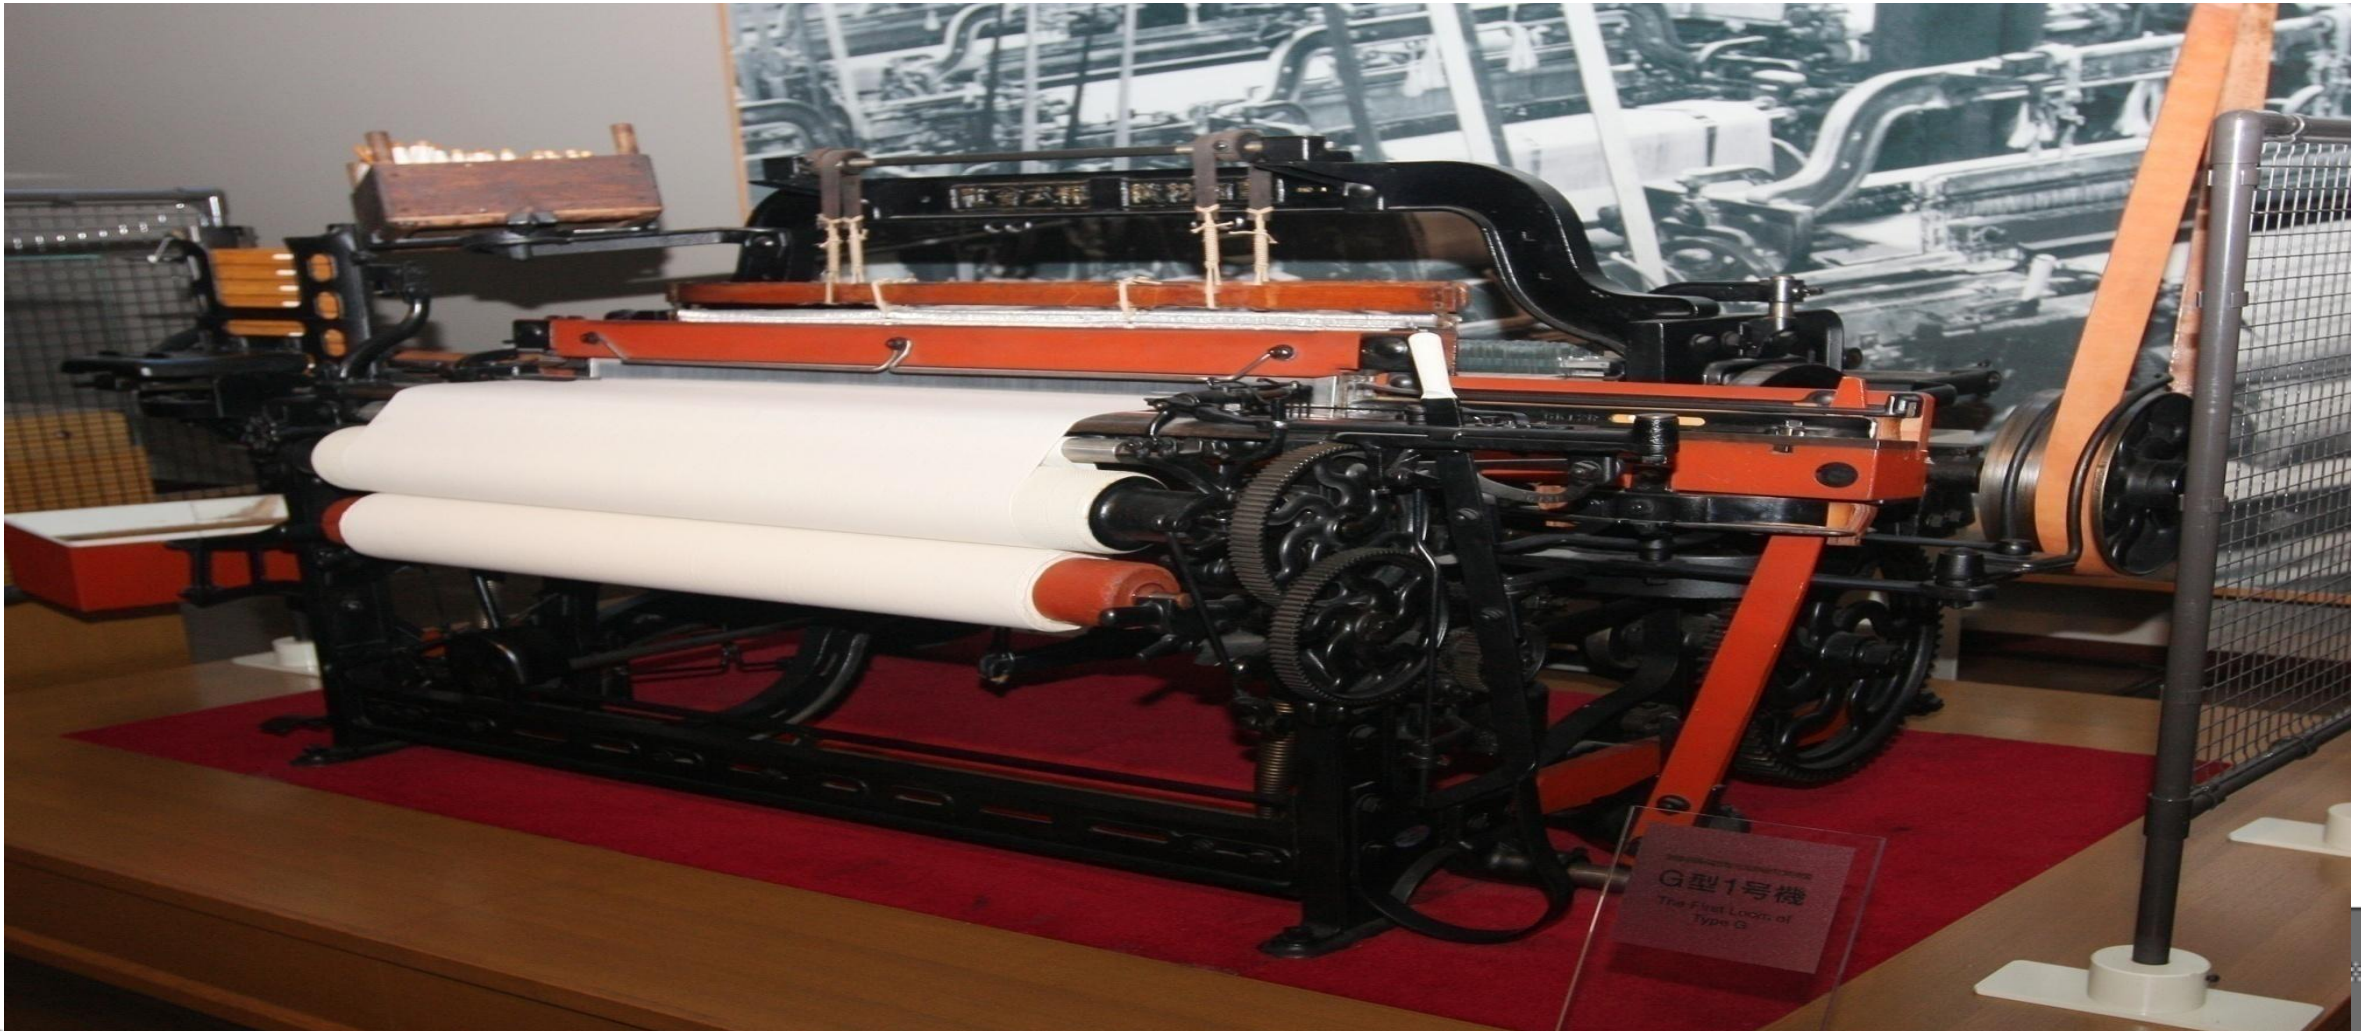

**Enhancing
Productivity**

Lean Principles

Toyoda Case Study

Automated Looming Machine

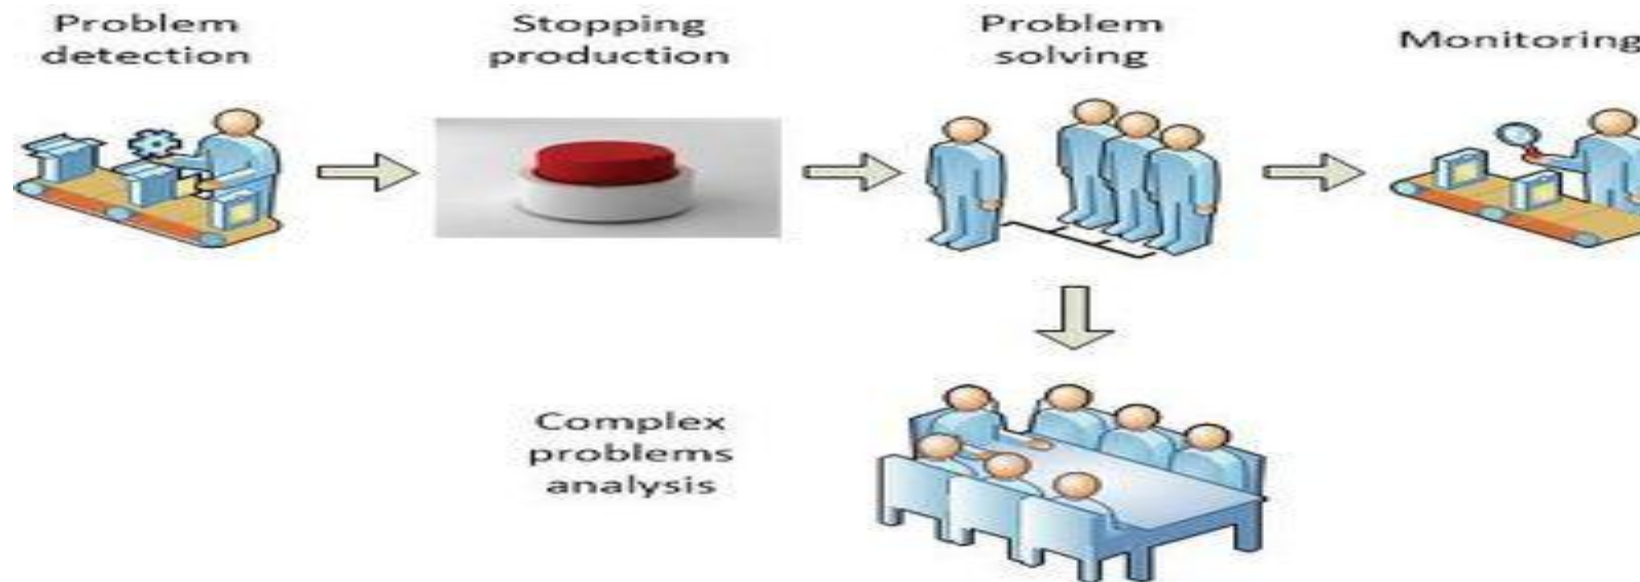

- Automatically stopped if there is defect in production.
- You will never product defected product
- No manual dependency for operation
- Scaling is easy

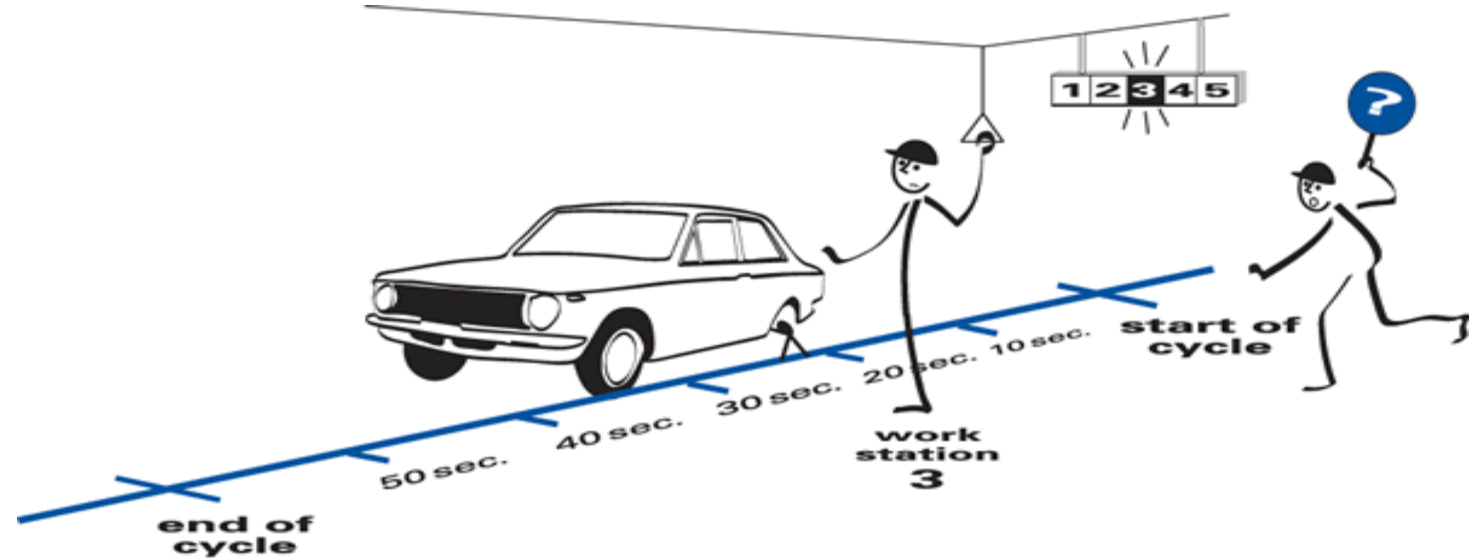

Automation + People = Autonomation

The Evolution toward Jidoka

Something Wrong

Manager Help:

If we can't fix whole production line stop, Everyone try to fix

- Empower
- Responsible
- Support
- Trust
- No Blame Game
- Quality

the production line

the production line?

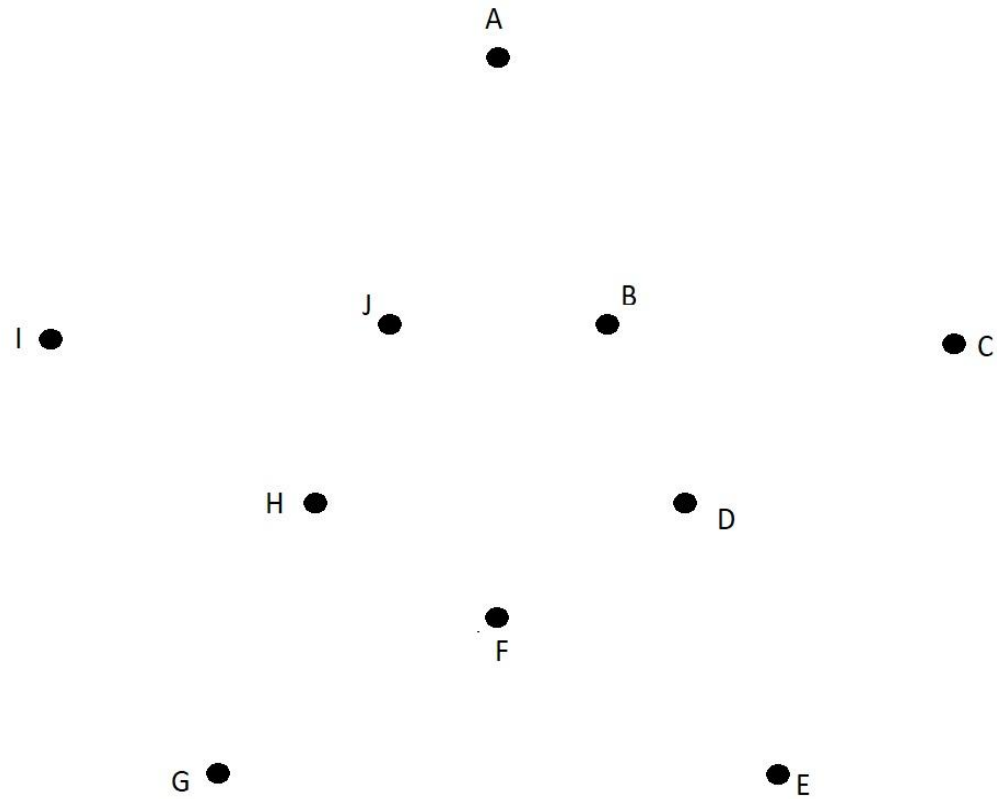

Lean Principles

Partially done work
Unused features
Relearning
Handoffs
Delays
Task switching
Defects

Lean Simulation

Connect the dots in following steps:

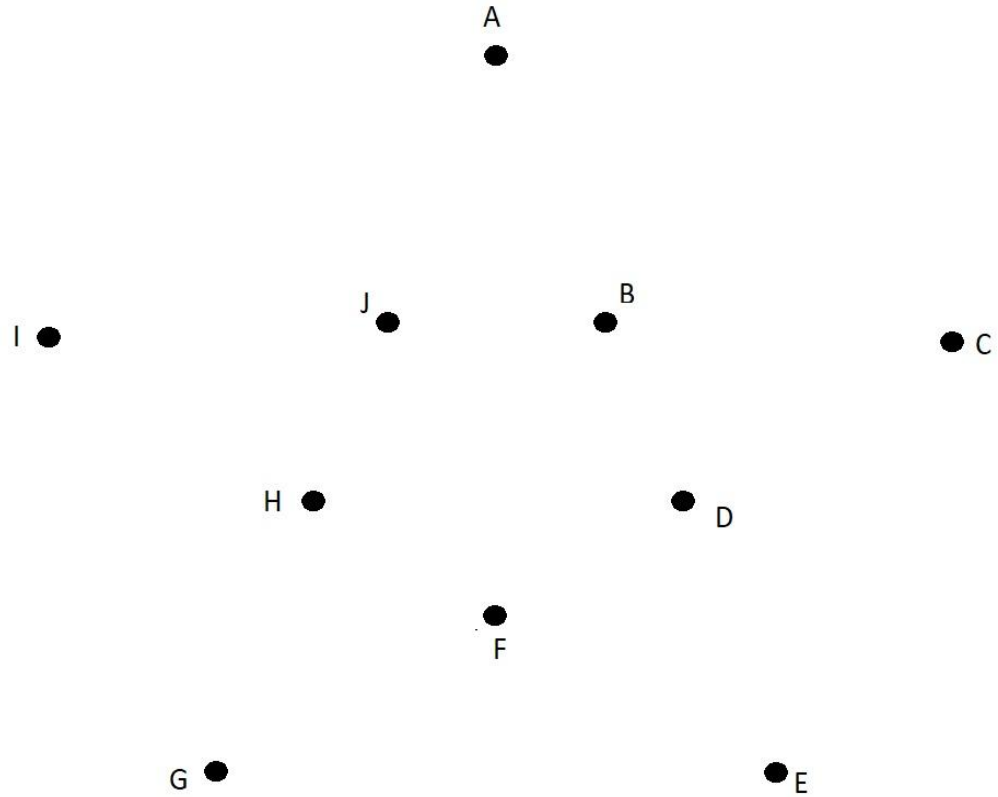

- 1) $A \rightarrow B$
- 2) $B \rightarrow C$
- 3) $C \rightarrow D$
- 4) $D \rightarrow E$
- 5) $E \rightarrow F$
- 6) $F \rightarrow G$
- 7) $G \rightarrow H$
- 8) $H \rightarrow I$
- 9) $I \rightarrow J$
- 10) $J \rightarrow A$

CASE A: Batch Size = 5

CASE B: Batch Size = 1

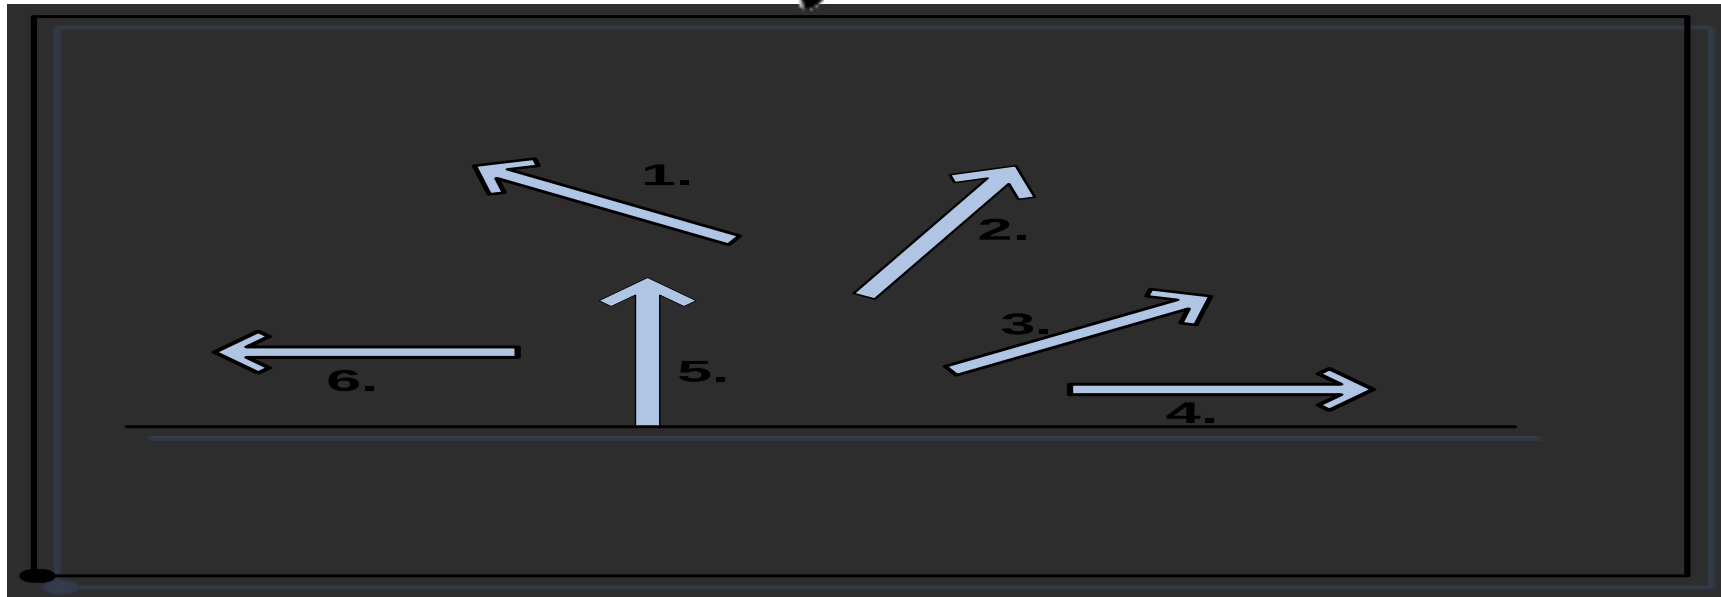

Lean Simulation

Lets evaluate how many lean principle we experienced by this exercise

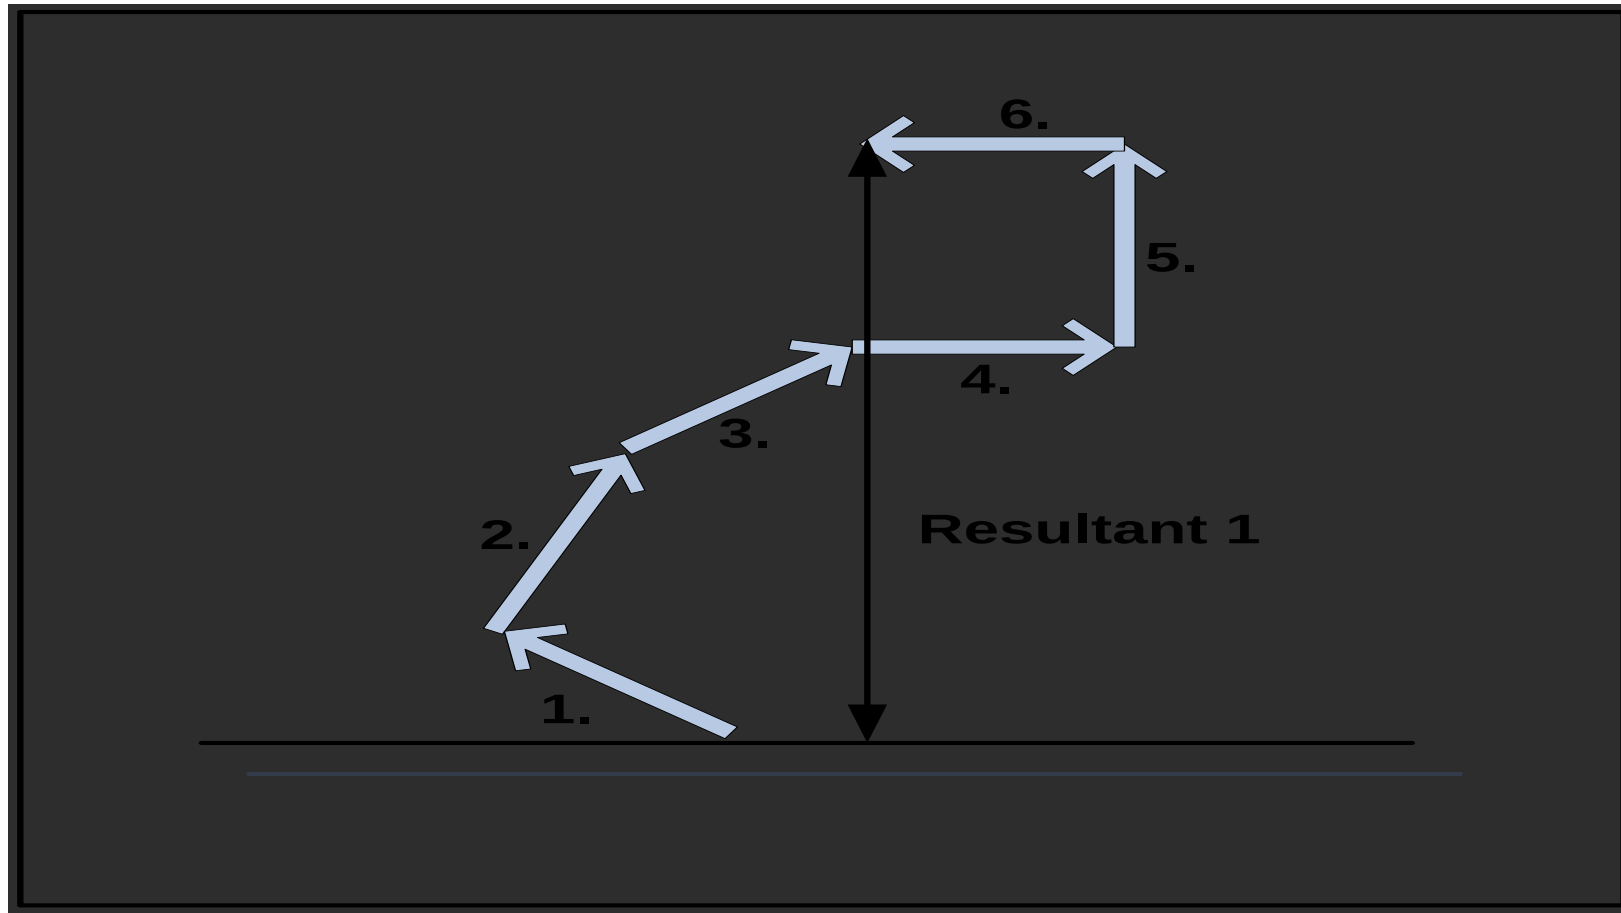

Team Synchronization

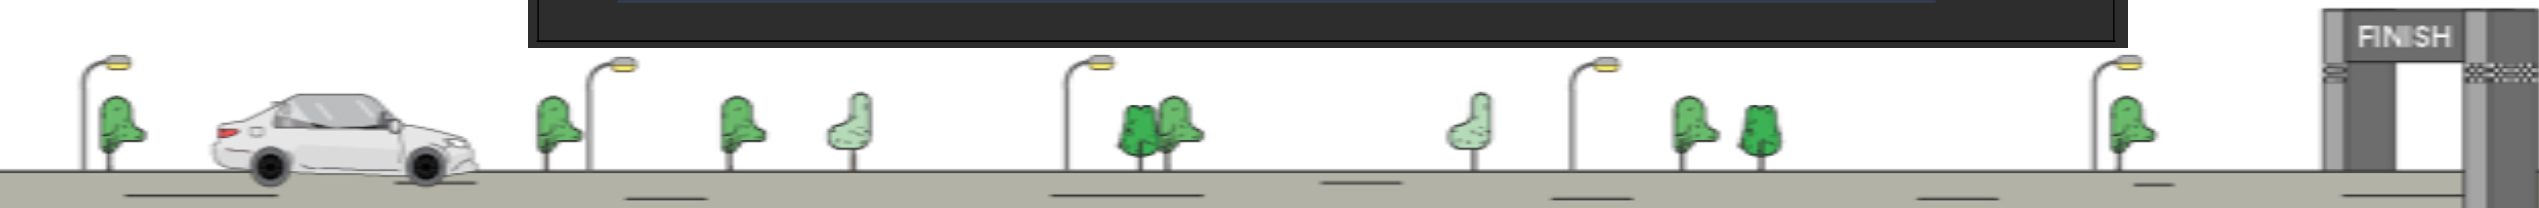

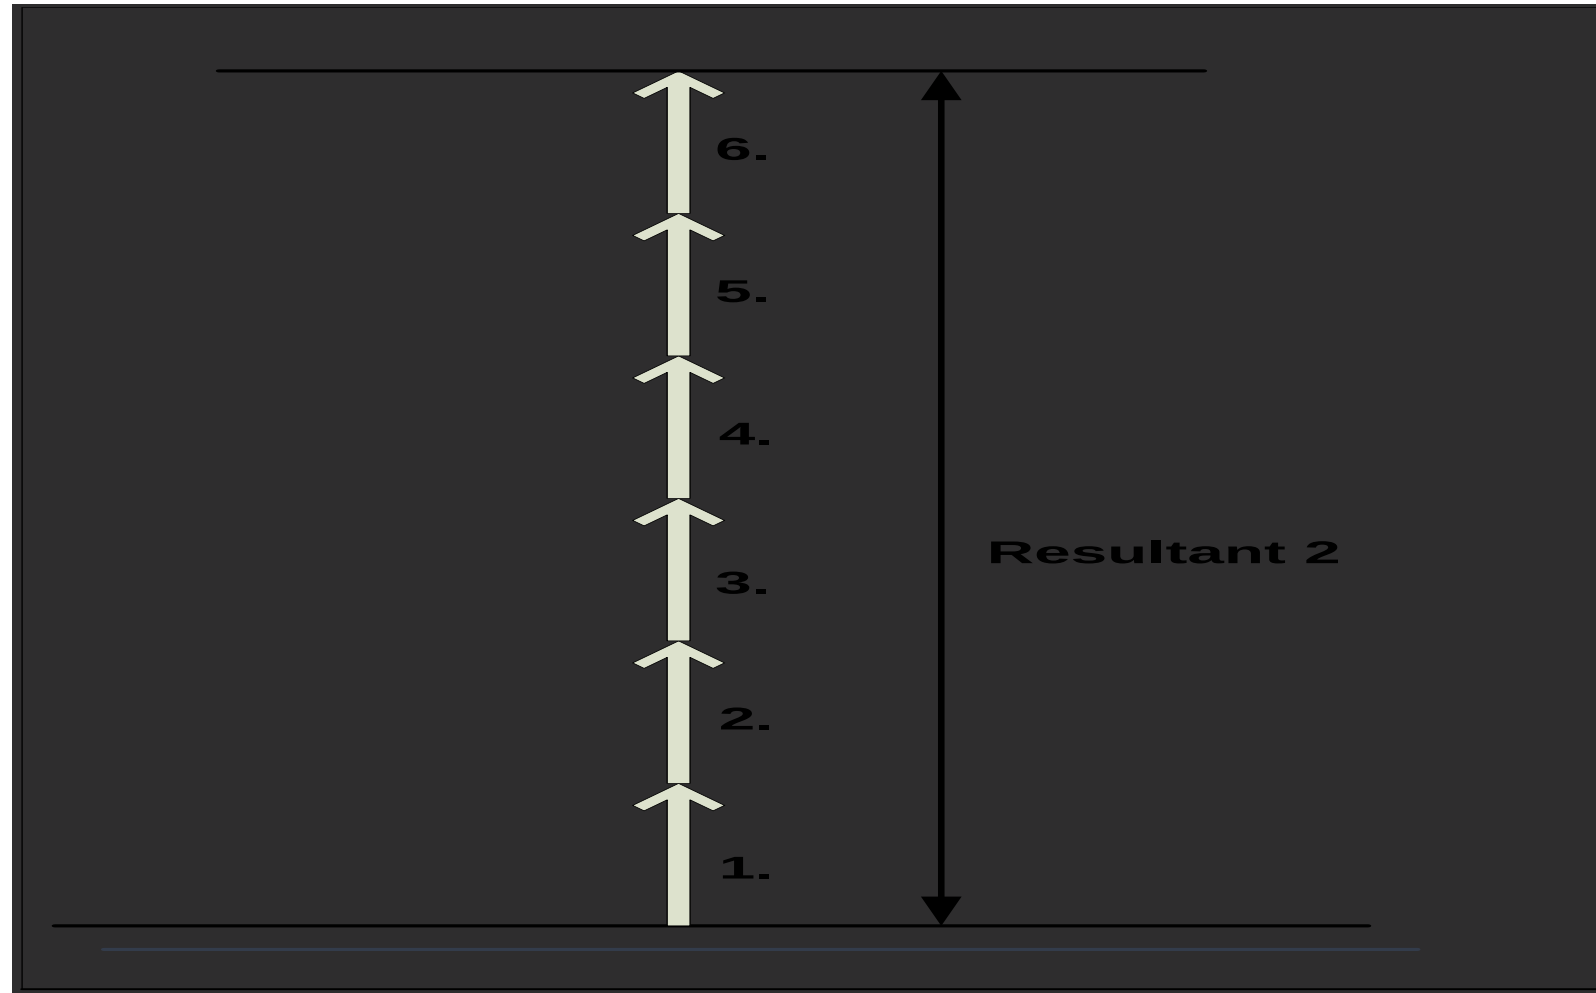

Team Synchronization

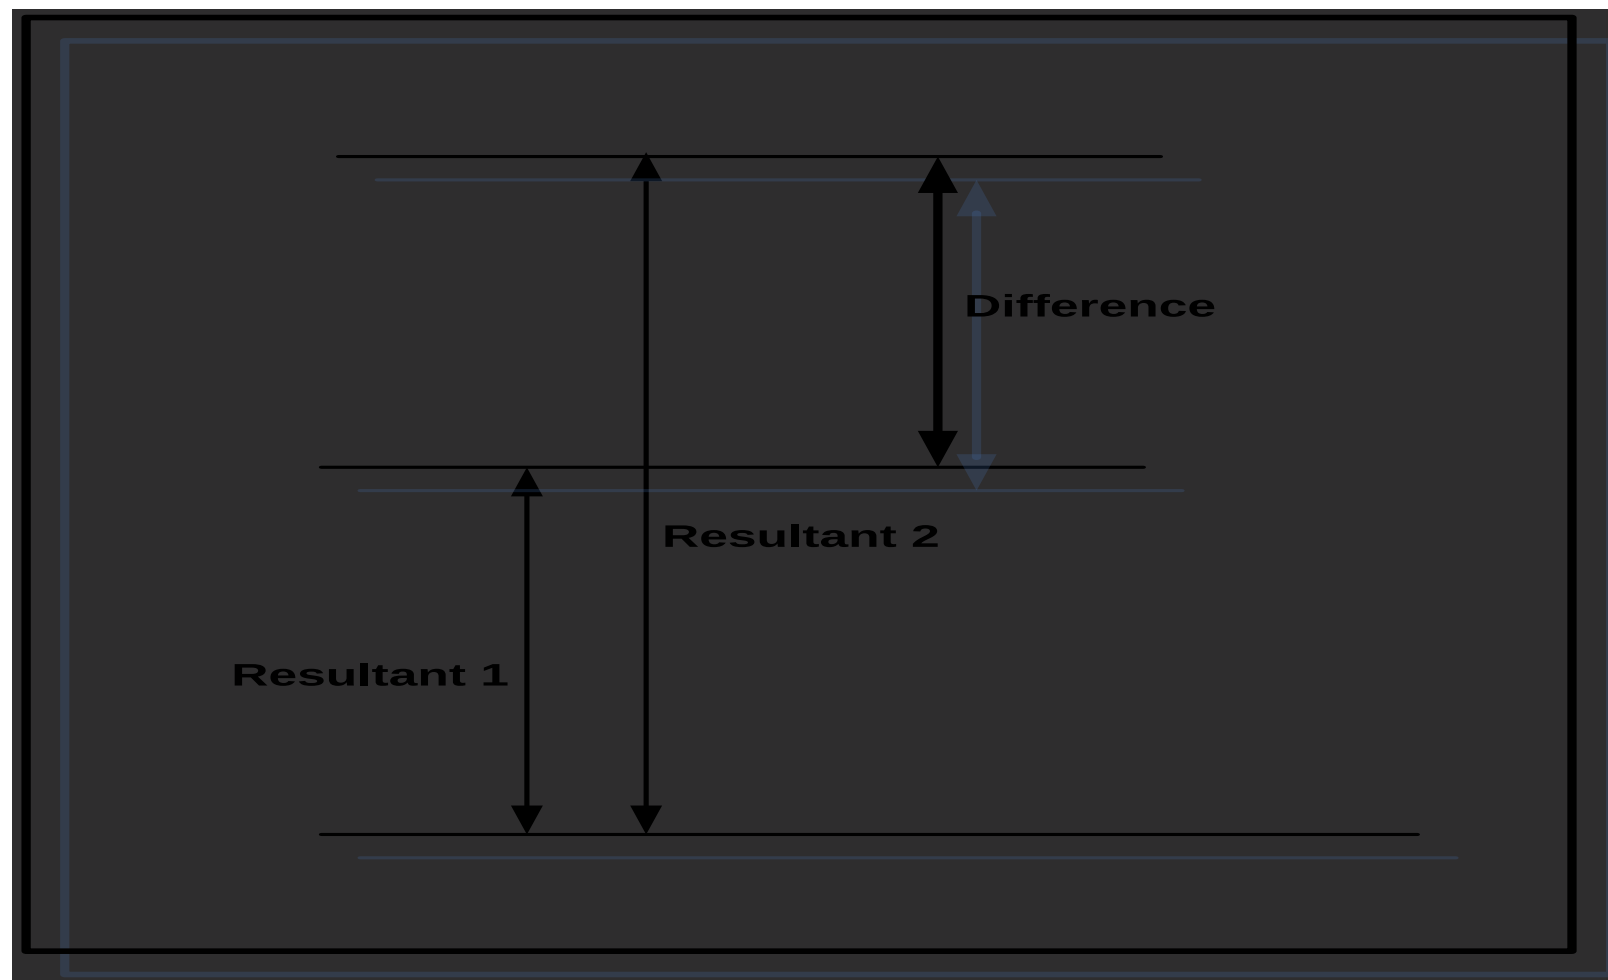

Team Synchronization

Team Synchronization

Agility – like T-2

Agility – like Gumbie

Agility – like Abdul Razzaq

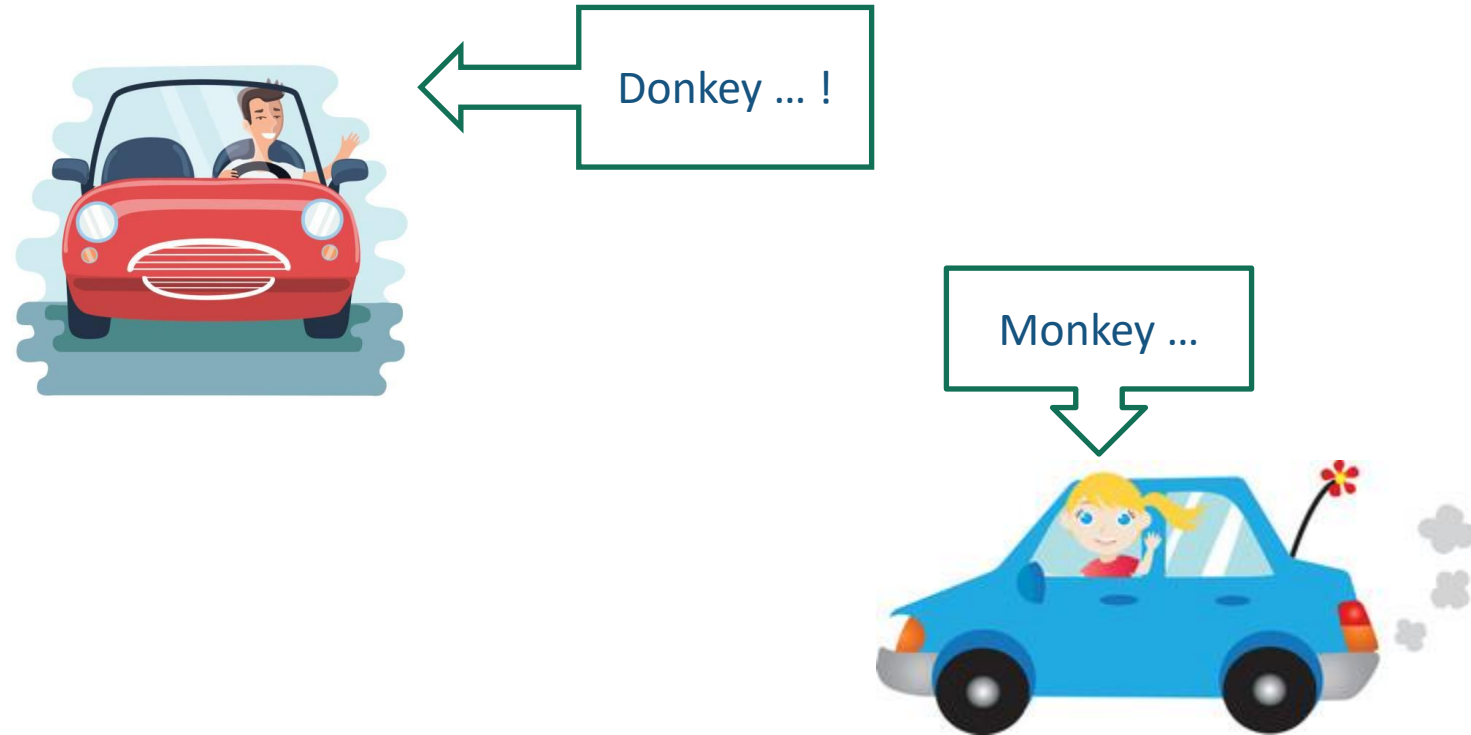

Position	Inns	Runs
Opening	3	77
3	27	746
4	3	25
5	6	199
6	41	837
7	84	2007
8	52	1066
9	9	77
10	2	46
11	1	0
Overall	228	5080

Agility is

Agility is not reaction, agility is ability to response

Quiz # 1.

1. Define Entrepreneur?
2. Meaning of KaiZen?
3. Define Lean Principal?
5. What are the 5 Take away of Lean Startup by Eric Reis?
